DETAILED ACTION

Claim Objections

1. Claim 6 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.
3. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. How is it possible to neutralize a reaction to a pH greater than 7.0 especially since the pH of 7.0 normally represents neutralization? Is Applicant's neutralization step there to make the carbon particles nonreactive or reactive and if so why and how? It is unclear as to why neutralization is taking place and what is its effect on the carbon particles or its environment.
5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Arai PAJ 11-323175 teaches a method of making water dispersible, stable carbon black having a DBP of 56 ml/100 g that is surface treated by wet oxidation with ammonium peroxodisulfate and of alpha olefin sulfonic-acid system dispersant at 60 C for 10 hours, filtering, dispersing in water, neutralizing with sodium hydroxide and ultra-filtering to produce the water dispersible carbon black.
